Author Index

VOLUMES 201–208 (1982)

Aaberg, L. See Malmstroem, A.
Aakre, S. E. See Little, C.
——; Little, C.
Inhibition of Bacillus cereus phospholipase C by univalent anions. 203: 799
Aasa, R. See Wilson, M. T.
Abbondanza, A. See Falasca, A.
Abe, E. See Tanaka, H.
Abraham, E. P. See White, R. L.
Ades, I. Z.
——; Harpe, K. G.
Isolation of the mature subunit of δ-aminolevulinate synthase from embryonic chick liver. 205: 257
Adlersberg, J. B. See Keiser, H. D.
Adzamli, I. K.
——; Kim, H. O. W.; Sykes, A. G.
Neutral complexes as oxidants for the reduced form of parsley (Petroselinum crispum) (2Fe–2S) ferredoxin. Evidence for partial blocking by redox-inactive chromium(III) complexes. 203: 669
Afting, E. G. See Kay, J.
Aftring, R. P. See May, E. E.
Agius, L.
——; Vaartjes, W. J.
The effects of orthovanadate on fatty acid synthesis in isolated rat hepatocytes. 202: 791
Agrawal, D. See Agrawal, H. C.
Agrawal, H. C.
——; O'Connell, K.; Randle, C. L.; Agrawal, D.
Phosphorylation in vivo of four basic proteins of rat brain myelin. 201: 39
Ahmad, F. See Ahmad, P. M.; Clements, P. R.
Ahmad, P. M. See Clements, P. R.
——; Feltman, D. S.; Ahmad, F.
Rat mammary-gland fatty acid synthase. A simple purification procedure and stoichiometry of CoA ester binding. 203: 45
Studies on acetyl-CoA carboxylase and fatty acid synthase from rat mammary gland and mammary tumors. 208: 443
Aitchison, R. E. D.
——; Clegg, R. A.; Vernon, R. G.
Lipolysis in rat adipocytes during pregnancy and lactation. The response to noradrenaline 202: 243
Akhtar, M.
——; Calder, M. R.; Corina, D. L.; Wright, J. N.
Mechanistic studies on C-19 demethylation in estrogen biosynthesis. 201: 569
Albano, E.
——; Lott, K. A. K.; Slater, T. F.; Stier, A.; Symons, M. C. R.; Tomasi, A.
Spin-trapping studies on the free-radical products formed by metabolic activation of carbon tetrachloride in rat liver microsomal fractions, isolated hepatocytes and in vivo in the rat. 204: 593
Al-Dujaili, E. A. S.
——; Williams, B. C.; Edwards, C. R. W.; Salacinski, P.; Lowry, P. J.
Human γ-melanotropin precursor potentiates corticotropin-induced adrenal steroidogenesis by stimulating mRNA synthesis. 204: 301
Alemany, S.
——; Varela, I.; Mato, J. M.
Inhibition of phosphatidylcholine synthesis by vasopressin and angiotensin in rat hepatocytes. 208: 453
Aletti, M. G. See Cairo, G.
Alexander, R. W.
——; Galper, J. B.; Neer, E. J.; Smith, T. W.
Noncoordinate development of β-adrenergic receptors and adenylate cyclase in chick heart. 204: 825
Alhadeff, J. A.
——; Holzinger, R. T.
Presence of an atypical thermolabile species of β-hexosaminidase B in metastatic-tumor tissue of human liver. 201: 95
Alhonen-Hongisto, L.
——; Veijalainen, P.; Ek-Kommonen, C.; Janne, J.
Polyamines in mycoplasmas and in mycoplasma-infected tumor cells. 202: 267
Alitalo, K. See Majamaa, K.
Allen, A. K. See Ashford, D.; Ferguson, M. A. J.
Allen, C. M. See Paine, A. J.
Allen, G.
Structure and properties of human interferon-α from Namalwa lymphoblastoid cells 207: 397
Allred, J. B.
——; Goodson, J.
Does pyruvate carboxylase interfere with the radioactive bicarbonate fixation assay of acetyl-CoA carboxylase?. 208: 247
Al-Naama, L. M. R. See Rowsell, K. V.
Al-Naama, M. M. See Rowsell, E. V.
Alonso, F. See Garcia Gil, M.
Al-Timari, A. See Douglas, K. T.; D'Silva, C.
Altmann, K.
——; Pyliotis, N. A.; Mukkur, T. K. S.
A new method for the extraction and purification of K99 pili from enterotoxigenic Escherichia coli and their characterization. 201: 505
Alvarez Chiva, V. See Garcia Gil, M.
Amenta, J. S. See Baccino, F. M.
Amos, H. See Gay, R. J.
Anderson, C. E. See Mian, N.
Anderson, P. See Lewis, S. E. M.
Anderson, P. J. See Atkins, H.
Andersson, B. M. See Ohisalo, J. J.
Andersson, L. O. See Sandberg, H.
Andersson, S. M. See Ohisalo, J. J.
Ansell, G. B. See Spanner, S.
Ansell, S. See Critchley, D. R.
Anstee, D. J. See Judson, P. A.
Anthony, C. See Beardmore-Gray, M.
Antonini, E. See Silvestrini, M. C.
Aoyagi, T. See Kay, J.
Applebaum, S. W. See James, T. C.
Ardawi, M. S. M.
——; Newsholme, E. A.
Maximum activities of some enzymes of glycolysis, the tricarboxylic acid cycle and ketone-body and glutamine utilization pathways in lymphocytes of the rat. 208: 743
Areliano, R. See Fleming, N.
Arinze, I. J. See Shipp, D. A.
Arizmendi, J. M. See Serra, J. L.
Arlaud, G. J. See Chesne, S.; Villiers, C. L.
——; Gagnon, J.; Porter, R. R.
The catalytic chain of human complement subcomponent C1r. Purification and N-terminal amino acid sequences of the major cyanogen bromide-cleavage fragments. 201: 49
Arnaud, P. See Gianazza, E.
Aron, G. M. See Barbieri, L.
Aronson, N. N. Jr.
Use of radioactive glucosamine in the perfused rat liver to prepare α_1-acid glycoprotein (orosomucoid) with tritium- or carbon-14-labeled sialic acid and N-acetylglucosamine residues. 203: 141
Ashford, D.
——; Allen, A. K.; Neuberger, A.
The production and properties of an antiserum to potato

(Solanum tuberosum) lectin. 201: 641
——; Desai, N. N.; Allen, A. K.; Neuberger, A.; O'Neill, M.; Selvendran, R. R.
Structural studies of the carbohydrate moieties of lectins from potato (Solanum tuberosum) tubers and thorn-apple (Datura stramonium) seeds. 201: 199
Atassi, M. Z. See Kazim, A. L.
——; Sakata, S.
Binding with lysozyme of antibodies against surface-simulation peptides representing the lysozyme antigenic sites. 201: 669
Atkins, H.
——; Anderson, P. J.
Actin and tubulin of normal and leukemic lymphocytes. 207: 535
Atkinson, T. See Scawen, M. D.
Aumailley, M.
——; Krieg, T.; Razaka, G.; Mueller, P. K.; Bricaud, H.
Influence of cell density on collagen biosynthesis in fibroblast cultures. 206: 505
Aviles, F. X. See Vendrell, J.
Avruch, J. See Blackshear, P. J.
Awasthi, Y. C. See Saneto, R. P.
Axelson, M.
——; Kirk, D. N.; Farrant, R. D.; Cooley, G.; Lawson, A. M.; Setchell, K. D. R.
The identification of the weak estrogen equol [7-hydroxy-3-(4'-hydroxyphenyl)chroman] in human urine. 201: 353
Azad, A. A. See Ward, C. W.
Azila, N.
——; Hawthorne, J. N.
Subcellular localization of phospholipid changes in response to muscarinic stimulation of perfused bovine adrenal medulla. 204: 291
Azuri, R. See Erman, A.

Baccino, F. M.
——; Tessitore, L.; Cecchini, G.; Messina, M.; Zuretti, M. F.; Bonelli, G.; Gabriel, L.; Amenta, J. S.
Control of cell protein catabolism in rat liver. Effects of starvation and administration of cycloheximide. 206: 395
Bachhawat, B. K. See Mohan, S.
Bachmann, C.
——; Kraehenbuehl, S.; Colombo, J. P.
Purification and properties of acetyl-CoA:L-glutamate N-acetyltransferase from human liver. 205: 123
Bachrach, U. See Lawrence, F.
Badaway, A. A. B.
——; Morgan, C. J.
Tryptophan and tryptophan pyrrolase in heme regulation. The role of lipolysis and direct displacement of serum protein-bound tryptophan in the opposite effects of administration of endotoxin, morphine, palmitate, salicylate, and theophylline on rat liver 5-aminolevulinate synthase activity and the heme saturation of tryptophan pyrrolase. 206: 451
Badawy, A. A. B.
Evidence against involvement of cytochrome P-450 haem in the regulation of synthesis of mammalian liver 5-aminolaevulinate synthase. 202: 807
——; Welch, A. N.; Morgan, C. J.
Tryptophan pyrrolase in heme regulation. The mechanisms of enhancement of rat liver 5-aminolevulinate synthase activity by starvation and of the glucose effect on induction of the enzyme by 2-allyl-2-isopropylacetamide. 206: 441
——; Williams, D. L.
Enhancement of rat brain catecholamine synthesis by administration of small doses of tyrosine and evidence for substrate inhibition of tyrosine hydroxylase activity by large doses of the amino acid. 206: 165
——; Williams, D. L.; Snape, B. M.; Evans, M.
Brain tyrosine aminotransferase: identity and possible role in the regulation of catecholamine synthesis. 204: 622
Baden, I. See Hlavica, P.
Bader, H. See Gietzen, K.
Baggiolini, M. See Murphy, G.
Bagyinka, C.
——; Kovacs, K. L.; Rak, E.
Localization of hydrogenase in Thiocapsa roseopersicina photosynthetic membrane. 202: 255
Bailey, C. J.
——; Martin, S. R.; Bayley, P. M.
A circular-dichroism study of epidermolytic toxins A and B from Staphylococcus aureus. 203: 775
Bailyes, E. M.
——; Newby, A. C.; Siddle, K.; Luzio, J. P.
Solubilization and purification of rat liver 5'-nucleotidase by use of a zwitterionic detergent and a monoclonal-antibody immunoadsorbent. 203: 245
Baines, B. S.
——; Brocklehurst, K.
Characterization of papaya peptidase A as a cysteine proteinase of Carica papaya L. with active-center properties that differ from those of papain by using 2,2'-dipyridyl disulfide and 4-chloro-7-nitrobenzofurazan as reactivity probes. Use of two-protonic-state electrophiles in the identification of catalytic-site thiol groups. 205: 205
Bairoch, A.
Suggestion to research groups working on protein and peptide sequence. 203: 527
Bakker, G. H.
——; Hoogerbrugge, J. W.; Rommerts, F. F. G.; Van der Molen, H. J.
Lutropin increases phosphorylation of a 33000-dalton ribosomal protein in rat tumor Leydig cells. 204: 809
Balasubramaniam, S. See Beins, D. M.
Baldaccini, N. E. See Pelosi, P.
Baldwin, J. E. See White, R. L.
Balfre, K. See Mian, N.
Ballard, F. J.
Regulation of protein accumulation in cultured cells. 208: 275
Balthrop, J. E.
——; Dameron, C. T.; Harris, E. D.
Comparison of pathways of copper metabolism in aorta and liver. A functional test of metallothionein. 204: 541
Bandurski, R. S. See Corcuera, L. J.; Michalczuk, L.
Barakat, H. A. See Kasperek, G. J.
——; Kasperek, G. J.; Dohm, G. L.; Tapscott, E. B.; Snider, R. D.
Fatty acid oxidation by liver and muscle preparations of exhaustively exercised rats. 208: 419
Baraniak, J. See Jarvest, R. L.
Barbieri, L. See Falasca, A.
——; Aron, G. M.; Irvin, J. D.; Stirpe, F.
Purification and partial characterization of another form of the antiviral protein from the seeds of Phytolacca americana L. (pokeweed). 203: 55
Barclay, A. N. See Hsiung, L. M.
Barden, R. E. See Clements, P. R.
Bardsley, M. E.
——; Brand, M. D.
Oxaloacetate- and acetoacetate-induced calcium efflux from mitochondria occurs by reversal of the uptake pathway. 202: 197
Barenholz, Y. See Yedgar, S.
Barnes, D. W. See Kasperek, G. J.
Barra, D. See Bossa, F.
Barrett, A. J. See Kirschke, H.; Starkey, P. M.
——; Kembhavi, A. A.; Brown, M. A.; Kirschke, H.; Knight, C. G.; Tamai, M.; Hanada, K.
L-trans-Epoxysuccinyl-leucy-

lamido(4–guanidino)butane (E–64) and its analogs as inhi⊃ bitors of cysteine proteinases including cathepsins B, H, and L. 201: 189
Barritt, G. J. See Whiting, J. A.
Barskaya, N. V.
——; Gusev, N. B.
Biological activities of bovine cardiac–muscle troponin C C–terminal peptide (residues 84–161). 207: 185
Barter, P. J.
——; Hopkins, G. J.; Calvert, G. D.
Transfers and exchanges of esterified cholesterol between plasma lipoproteins. 208: 1
Bartholeyns, J.
——; Baudhuin, P.
Effects of crosslinked dimers of ribonuclease A or of lysozyme on the processing of endocy⊃ tosed peroxidase by hepatoma cells. 202: 543
Barwick, J. L. See Newman, S. L.
Bates, D. A.
——; Winterbourn, C. C.
Reactions of Adriamycin with hemoglobin. Superoxide dis⊃ mutase indirectly inhibits reactions of the Adriamycin semiquinone. 203: 155
Batra, S. P.
——; Nicholson, B. H.
9–Azidoacridine, a new photoaf⊃ finity label for nucleotide– and aromatic–binding sites in proteins. 207: 101
Battelli, M. G.
——; Lorenzoni, E.
Purification and properties of a new glutathione–dependent thiol:disulfide oxidoreductase from rat liver. 207: 133
Bauche, F.
——; Sabourault, D.; Giudicelli, Y.; Nordmann, J.; Nordmann, R.
Effects of 2–mercaptoacetate in isolated liver mitochondria in vitro. Competitive inhibition of 3–hydroxybutyrate dehyd⊃ rogenase and depression of the β–oxidation pathway. 206: 53
Baudhuin, P. See Bartholeyns, J.
Baulieu, E. E. See Lebeau, M. C.; Yang, C. R.
Baum, C. L.
——; Selhub, J.; Rosenberg, I. H.
The hydrolysis of nicotinamide adenine dinucleotide by brush border membranes of rat intes⊃ tine. 204: 203
Bause, E.
——; Hettkamp, H.; Legler, G.
Conformational aspects of N–⊃ glycosylation of proteins. Stu⊃ dies with linear and cyclic peptides as probes. 203: 761
——; Legler, G.
The effect of flavomycin on the synthesis and transfer of lip⊃ id–linked saccharides in pig brain. 201: 481
Bayley, P. M. See Bailey, C. J.; Martin, S. R.
Bazin, R. See Lavau, M.
Beardmore–Gray, M.
——; O'Keeffe, D. T.; Anthony, C.
The autoreducible cytochromes c of the methylotrophs Methylo⊃ philus methylotrophus and Pseudomonas AM1. 207: 161
Beauregard, G. See McNamara, D.
Beck, P. W. See Stipanuk, M. H.
Beebee, T. J. C.
——; Carty, D. S.
Purification and radioimmu⊃ noassay of rat lactate dehyd⊃ rogenase A and B subunits. 205: 313
Behrman, E. J.
3–Hydroxy–4–sulfonyloxybenzoic acid. Comments. 201: 677
Beinert, H. See Steenkamp, D. J.
Beins, D. M.
——; Vining, R.; Balasubraman⊃ iam, S.
Regulation of neutral cholesterol esterase and acyl–CoA:cholest⊃ erol acyltransferase in the rat adrenal gland. 202: 631
Belisle, M. See McNamara, D.
Bell, P. A. See Jones, T. R.; Weatherill, P. J.
Bellini, T. See Dallocchio, F.
Belsham, G. J.
——; Brownsey, R. W.; Denton, R. M.
Reversibility of the insulin–sti⊃ mulated phosphorylation of ATP citrate lyase and a cyto⊃ plasmic protein of subunit M_r 22000 in adipose tissue. 204: 345
Beltramini, M.
——; Lerch, K.
Fluorescence properties of Neu⊃ rospora tyrosinase. 205: 173
Benett, P. See Rowsell, K. V.
Benito, M.
——; Lorenzo, M.; Medina, J. M.
Relationship between lipogenesis and glycogen synthesis in ma⊃ ternal and fetal tissues during late gestation in the rat. Effect of dexamethasone. 204: 865
Benjamin, W. S. v. d. W. See Carter, W. J.
Bennett, J. P.
——; Cockcroft, S.; Caswell, A. H.; Gomperts, B. D.
Plasma–membrane location of phosphatidylinositol hydrolysis in rabbit neutrophils stimulated with formylmethionyl–leucyl⊃ phenylalanine. 208: 801
Bennett, R. A. See Pegg, A. E.
Bentley, P. See Waechter, F.
Ben–Yoseph, Y. See Momoi, T.
Benyoucef, M.
——; Rigaud, J. L.; Leblanc, G.
Cation transport mechanisms in Mycoplasma mycoides var. Capri cells. Sodium–depen⊃ dent potassium accumulation. 208: 529
Cation transport mechanisms in Mycoplasma mycoides var. Capri cells. The nature of the link between potassium and sodium transport. 208: 539
Bereta, J. See Koj, A.
Berg, R. A. See Saltzman, L. E.
Berggren, P. O. See Rorsman, P.
Bergh, M. L. E.
——; Koppen, P. L.; Van den Eijnden, D. H.
Specificity of ovine submaxil⊃ lary–gland sialyltransferases. Application of high–pressure liquid chromatography in the identification of sialooligosac⊃ charide products. 201: 411
Bernelli–Zazzera, A. See Cairo, G.
Berridge, M. J. See Irvine, R. F.
——; Downes, C. P.; Hanley, M. R.
Lithium amplified agonist–de⊃ pendent phosphatidylinositol responses in brain and salivary glands. 206: 587
Berridge, M. V. See Wakefield, J. St. J.
Berry, M. N. See Clark, D. G.
Bert, J. L.
——; Mathieson, J. M.; Pearce, R. H.
The exclusion of human serum albumin by human dermal collagenous fibers and within human dermis. 201: 395
Betto, D. D. See Salviati, G.
Betto, R. See Salviati, G.
Betts, G. F. See Bostian, K. A.
Bey, P. See Kallio, A.
Beynon, R. J. See Place, G. A.
Bhalla, R. C.
——; Sharma, R. V.; Gupta, R. C.
Isolation of two myosin light–⊃ chain kinases from bovine carotid artery and their regula⊃ tion by phosphorylation medi⊃ ated by cyclic AMP–dependent protein kinase. 203: 583
Bijsterbosch, M. K.
——; Duursma, A. M.; Bouma, J. M. W.; Gruber, M.
Endocytosis and breakdown of mitochondrial malate dehyd⊃ rogenase in the rat in vivo. Effects of suramin and leupep⊃ tin. 208: 61
Binderman, I. See Somjen, D.
Binek–Singer, P.
——; Johnson, T. C.
The effects of chronic hyperphe⊃ nylalaninemia on mouse brain protein synthesis can be pre⊃ vented by other amino acids. 206: 407

Biral, D.
——; Damiani, E.; Volpe, P.; Salviati, G.; Margreth, A.
Polymorphism of myosin light chains. An electrophoretic and immunological study of rabbit skeletal-muscle myosins. 203: 529
Birch, B.
——; Turnock, G.
Transfer RNA and ribosomal RNA are synthesized from the same pyrimidine nucleotide pool. 208: 89
Birkett, S. D. See Swann, R. W.
Bitonti, A. J.
——; McCann, P. P.; Sjoerdsma, A.
Restriction of bacterial growth by inhibition of polyamine biosynthesis by using monofluoromethylornithine, difluoromethylarginine, and dicyclohexylammonium sulfate. 208: 435
Bjoerk, I. See Danielsson, A.
——; Fish, W. W.
Evidence for similar conformational changes in α_2-macroglobulin on reaction with primary amines or proteolytic enzymes. 207: 347
Blackledge, G.
——; Vose, B.; Morris, A. J.; Crowther, D.; Gallagher, J. T.
Flow cytometric analysis of lectin binding to human peripheral blood lymphocytes. 208: 69
Blackshear, P. J.
——; Nemenoff, R. A.; Avruch, J.
Preliminary characterization of a heat-stable protein from rat adipose tissue whose phosphorylation is stimulated by insulin. 204: 817
Bladon, P. T.
——; Bowden, P. E.; Cunliffe, W. J.; Wood, E. J.
Prekeratin biosynthesis in human scalp epidermis. 208: 179
Blair, J. A. See Kennelly, J. C.
Blair, J. B. See James, M. E.
Blanchard, D. See Cartron, J. P.
——; Cartron, J. P.; Rouger, P.; Salmon, C.
Pj variant, a new hybrid MNSs glycoprotein of the human red-cell membrane. 203: 419
Blanco, A. See Burgos, C.
Bleasdale, J. E.
——; Maberry, M. C.; Quirk, J. G.
Myoinositol homeostasis in fetal rabbit lung. 206: 43
Bloor, J. H.
——; Dasmahapatra, A.; Weiser, M. M.; Klohs, W. D.
Kinetics of subcellular distribution in rat intestine of 1,25-dihydroxycholecalciferol administered in vivo. Evidence for concentration within 5 minutes into purified nuclei. 208: 567
Bloxham, D. P. See Poole, G. P.
Boegman, R. J. See Greenough, M. C.
Boegwald, J. See Lindahl, U.
Boeker, E. A.
Initial rates. A new plot. 203: 117
Bohley, P. See Kirschke, H.
Bohm, L.
——; Sautiere, P.; Cary, P. D.; Crane-Robinson, C.
Precise elimination of the N-terminal domain of histone H1. 203: 577
Bojesen, G. See Williams, D. H.
Bond, A. See Byfield, P. G. H.
Bond, U. See O'Fagain, C.
Bond, U. M. See James, T. C.
Bonelli, G. See Baccino, F. M.
Bonkowsky, H. L. See Sinclair, J. F.
Bonnett, R. See Stoll, M. S.
Boon, P. J. See Eley, C. G. S.
Booth, R. F. G. See Harvey, S. A. K.
Borbely, G. See Gregory, R. P. F.
Borensztajn, J.
——; Getz, G. S.; Padley, R. J.; Kotlar, T. J.
The apoprotein B-independent hepatic uptake of chylomicron remnants. 204: 609
Borowitzka, L. J. See Norton, R. S.
Bos, G. See Docter, R.
Bossa, F.
——; Savi, M. R.; Barra, D.; Brunori, M.
Structural comparison of the hemoglobin components of the armored catfish Pterygoplichthys pardalis. Evolutionary considerations. 205: 39
Bostian, K. A.
——; Betts, G. F.; Man, W. K.; Hughes, M. N.
Multiple binding of thallium and rubidium to potassium-activated yeast aldehyde dehydrogenase. Influences on tertiary structure, stability, and catalytic activity. 207: 73
Boswell, A. P.
——; Moore, G. R.; Williams, R. J. P.
The binding of platinum complexes to tuna cytochrome c. 201: 523
Boteva, R. See Genov, N.; Ricchelli, F.
Bottenus, R. E. See Spach, P. I.
Boucek, R. J. Jr.
——; Weiss, J.; Lembach, K. J.
Cell-type differences in the serum and cyclic AMP-dependent regulation of ornithine decarboxylase activity in two cultured fibroblast types. 204: 357
Bouet, F.
——; Menez, A.; Hider, R. C.; Fromageot, P.
Separation of intermediates in the refolding of reduced erabutoxin b by analytical isoelectric focusing in layers of polyacrylamide gel. 201: 495
Boulter, D. See Gatehouse, J. A.
Bouma, J. M. W. See Bijsterbosch, M. K.; De Jong, A. S. H.
Bowden, P. E. See Bladon, P. T.
Bower, D. J.
——; Errington, L. H.; Wainwright, N. R.; Sime, C.; Morris, S.; Clayton, R. M.
Cytoplasmic RNA sequences complementary to cloned chick δ-crystallin cDNA show size heterogeneity. 201: 339
Bowles, D. J. See Miller, R. C.
——; Brunton, C.
Interactions between platelet-surface glycoproteins. Identification of glycoproteins capable of binding to platelet surfaces. 202: 707
Bown, D. See Gatehouse, J. A.
Boyer, T. D.
——; Zakim, D.; Vessey, D. A.
Studies of endogenous inhibitors of microsomal glutathione S-transferase. 207: 57
Bradley, C. V. See Williams, D. H.
Brampton, A. D. See Emanuel, E. J.
Brand, M. D. See Bardsley, M. E.; Dippenaar, N. G.; Felber, S. M.; Price, B. D.
Brandon, M. R. See Hsiung, L. M.
Brass, C. A.
——; Greengard, O.
Modulation of cerebral catecholamine concentrations during hyperphenylalainemia. 208: 765
Braun, D. G. See Chang, J. Y.
Bray, R. C.
——; George, G. N.; Gutteridge, S.; Norlander, L.; Stell, J. G. P.; Stubley, C.
Studies by electron paramagnetic resonance spectroscopy of the molybdenum center of aldehyde oxidase. 203: 263
——; Lamy, M. T.; Gutteridge, S.; Wilkinson, T.
Evidence from electron-paramagnetic-resonance spectroscopy for a complex of sulfite ions with the molybdenum center of sulfite oxidase. 201: 241
Bremer, J. See Osmundsen, H.
Brent, M. See Fleming, N.
Bretz, U. See Murphy, G.
Briand, P. See Rabier, D.
Bricaud, H. See Aumailley, M.
Bridge, G. See Williams, J. A.
Brindle, K. M. See Simpson, R. J.
——; Brown, F. F.; Campbell, I. D.; Foxall, D. L.; Simpson, R. J.

A proton NMR study of isotope exchange catalyzed by glycolytic enzymes in the human erythrocyte. 202: 589
——; Campbell, I. D.; Simpson, R. J.
A ^{1}H NMR study of the kinetic properties expressed by glyceraldehyde phosphate dehydrogenase in the intact human erythrocyte. 208: 583
Brindley, D. N. See Cousins, C.

VOLUMES 201–208 (1982)

Acanthamoeba
ATPase rhythm cell cycle 202: 453
Acetaldehyde
alc dehydrogenase ethanol liver 206: 153
Acetoacetate
liver fatty acid starvation 206: 427
mitochondria calcium efflux 202: 197
Acetyl
CoA carboxylase activation insulin 202: 77
CoA carboxylase detn pyruvate carboxylase 208: 247
CoA carboxylase mammary regulation 204: 273
CoA carboxylase regulation liver 204: 757
hexosaminidase mucolipidosis 207: 421
Acetylated
lipoprotein metab liver calmodulin 208: 493
Acetylcholine
formation synaptosome anoxia hypoglycemia 206: 433
receptor membrane heart prepn 202: 475
AcetylCoA
carboxylase adipocyte glucagon 208: 783
carboxylase crude liver prepn 202: 559
carboxylase fatty acid synthase mammary 208: 443
carboxylase oil palm embryogenesis 208: 323
Acetylhexosaminidase
urine mucolipidosis III 204: 557
Acetylspermidine
metab organ 208: 189
Acetyltransferase
amino acid liver 205: 123
lipoate crosslinking NMR Escherichia 205: 389
Acid
branched oxo binding albumin 204: 265
hydrolase secretion macrophage complement 202: 639
lipase inhibitor serum 204: 221
sialic nomenclature 207: 367
Acidosis
metabolic liver muscle glutamine 202: 271
Acinar
cell parotid phosphatidate formation 204: 587
parotid phosphoinositide metab receptor 206: 555
Acini
pancreatic phospholipase 208: 713
Aconitase
activation conformation 203: 327
ACTH
steroidcgenesis adrenal melanotropin precursor 204: 301
Actin
inhibition DNase 207: 305
myosin complex assocn dissocn 203: 453
polymn mech stimulation 205: 281
protamine interaction 205: 31
spectrin erythrocyte membrane spherocytosis 201: 259
troponin interaction muscle calcium 203: 61
tubulin lymphocyte leukemia 207: 535
Actinomadura
Streptomyces clavulanate lactamase 207: 429
Streptomyces iodopenicillanate lactamase 207: 437
Active
site beta lactamase Pseudomonas Escherichia 201: 621
site ficin papain kinetics 201: 101
site papaya peptidase A sulfhydryl 205: 205
Actomyosin
insulin storage granule interaction 206: 157
Acyl
CoA dehydrogenase arginine 207: 415
CoA synthetase peroxisome localization 204: 17
phosphate phosphogluconate dehydrogenase phosphorylation 203: 401
Acylcarnitine
oxidn clofibrate liver mitochondria 208: 749
Acylhydrolase
prostaglandin synthase coupling kidney 201: 635
Acyltransferase
carnitine inhibition malonyl CoA 206: 177
carnitine mitochondria heart liver 202: 397
cholesterol rhythm adrenal 202: 631
glycerophosphate liver starvation 204: 247
Adenine
nucleotide catabolism hepatocyte anoxia 202: 117
Adenocarcinoma
mammary retinoic acid protein 208: 731
Adenosine
cyclic phosphorothioate cAMP phosphodiesterase 203: 461
deaminase acetylCoA carboxylase adipocyte glucagon 208: 783
hapten radioimmunoassay 208: 603
pancreas insulin release cAMP 204: 689
tetraphosphate platelet 208: 737
Adenosylhomocysteinase
liver inactivation hydroxynonyladenine 205: 585
Adenosylmethionine
decarboxylase liver mammary lactation 202: 693
decarboxylated ornithine decarboxlase inhibition 202: 519
liver membrane phospholipid methylation 206: 481
Adenylate
cyclase activation kinetics thermodn 205: 249
cyclase calcium calmodulin pancreas 206: 97
cyclase cAMP metab 202: 125
cyclase chondrocyte prostaglandin hormone 208: 35
cyclase heart embryo adrenoceptor 204: 825
cyclase isoenzyme heart 203: 361
cyclase lutropin desensitization erythrocyte 204: 613

A excess muscle protein 202: 499
D calcium binding protein 205: 49
D metab mammal 204: 185
K carboxylase liver cattle 201: 249
Vitellogenin
liver Xenopus gene expession 202: 491
mRNA probe locust 205: 521
Vitreous
humor hyaluronate bovine 207: 409
Volutin
granule compn yeast 201: 473
Weaning
acetyl CoA carboxylase liver 204: 757
Whale
heparin octasaccharide 205: 23
Wheat
aleurone amylase phospholipid gibberellate 208: 93
germ agglutinin grain receptor 206: 571
germ aspartate transcarbamoylase 203: 413
Whey
protein casein rabbit milk 201: 71
Xanthine
dehydrogenase chicken liver cytosol 202: 555
oxidase mammary tissue milk 202: 317
oxidase NAD thiol group 207: 341
Xenobiotic
metab Cunninghamella enzyme 205: 117
Xenopus
vitellogenin liver gene expession 202: 491
Yeast
cAMP phosphodiesterase 203: 461
hexokinase Cibacron Blue cation 205: 453
tRNA phenylalanine backbone folding 205: 457
volutin granule compn 201: 473
Zinc
Bacillus spore germination 208: 407
polyADP ribose polymerase inhibition 203: 511
RNase T1 inhibition kinetics 207: 357
